Renovation
and
Development
project**

1: Project Overview and Vision

The development Boys and Girls middle Al-Trabiyah Al-Islameyah school building schools was a deeply meaningful project that required sensitivity to the cultural values of the institutions and attention to the practical needs of students. Our company was honored to undertake the challenge of designing and constructing state-of-the-art for the building that promote physical well-being, creativity, and social interaction while staying true to Islamic principles. This project aimed to provide a sanctuary where students can safely explore, learn, and play. By balancing modern design techniques with traditional values, we aimed to create spaces that not only serve functional purposes but also inspire joy and harmony.

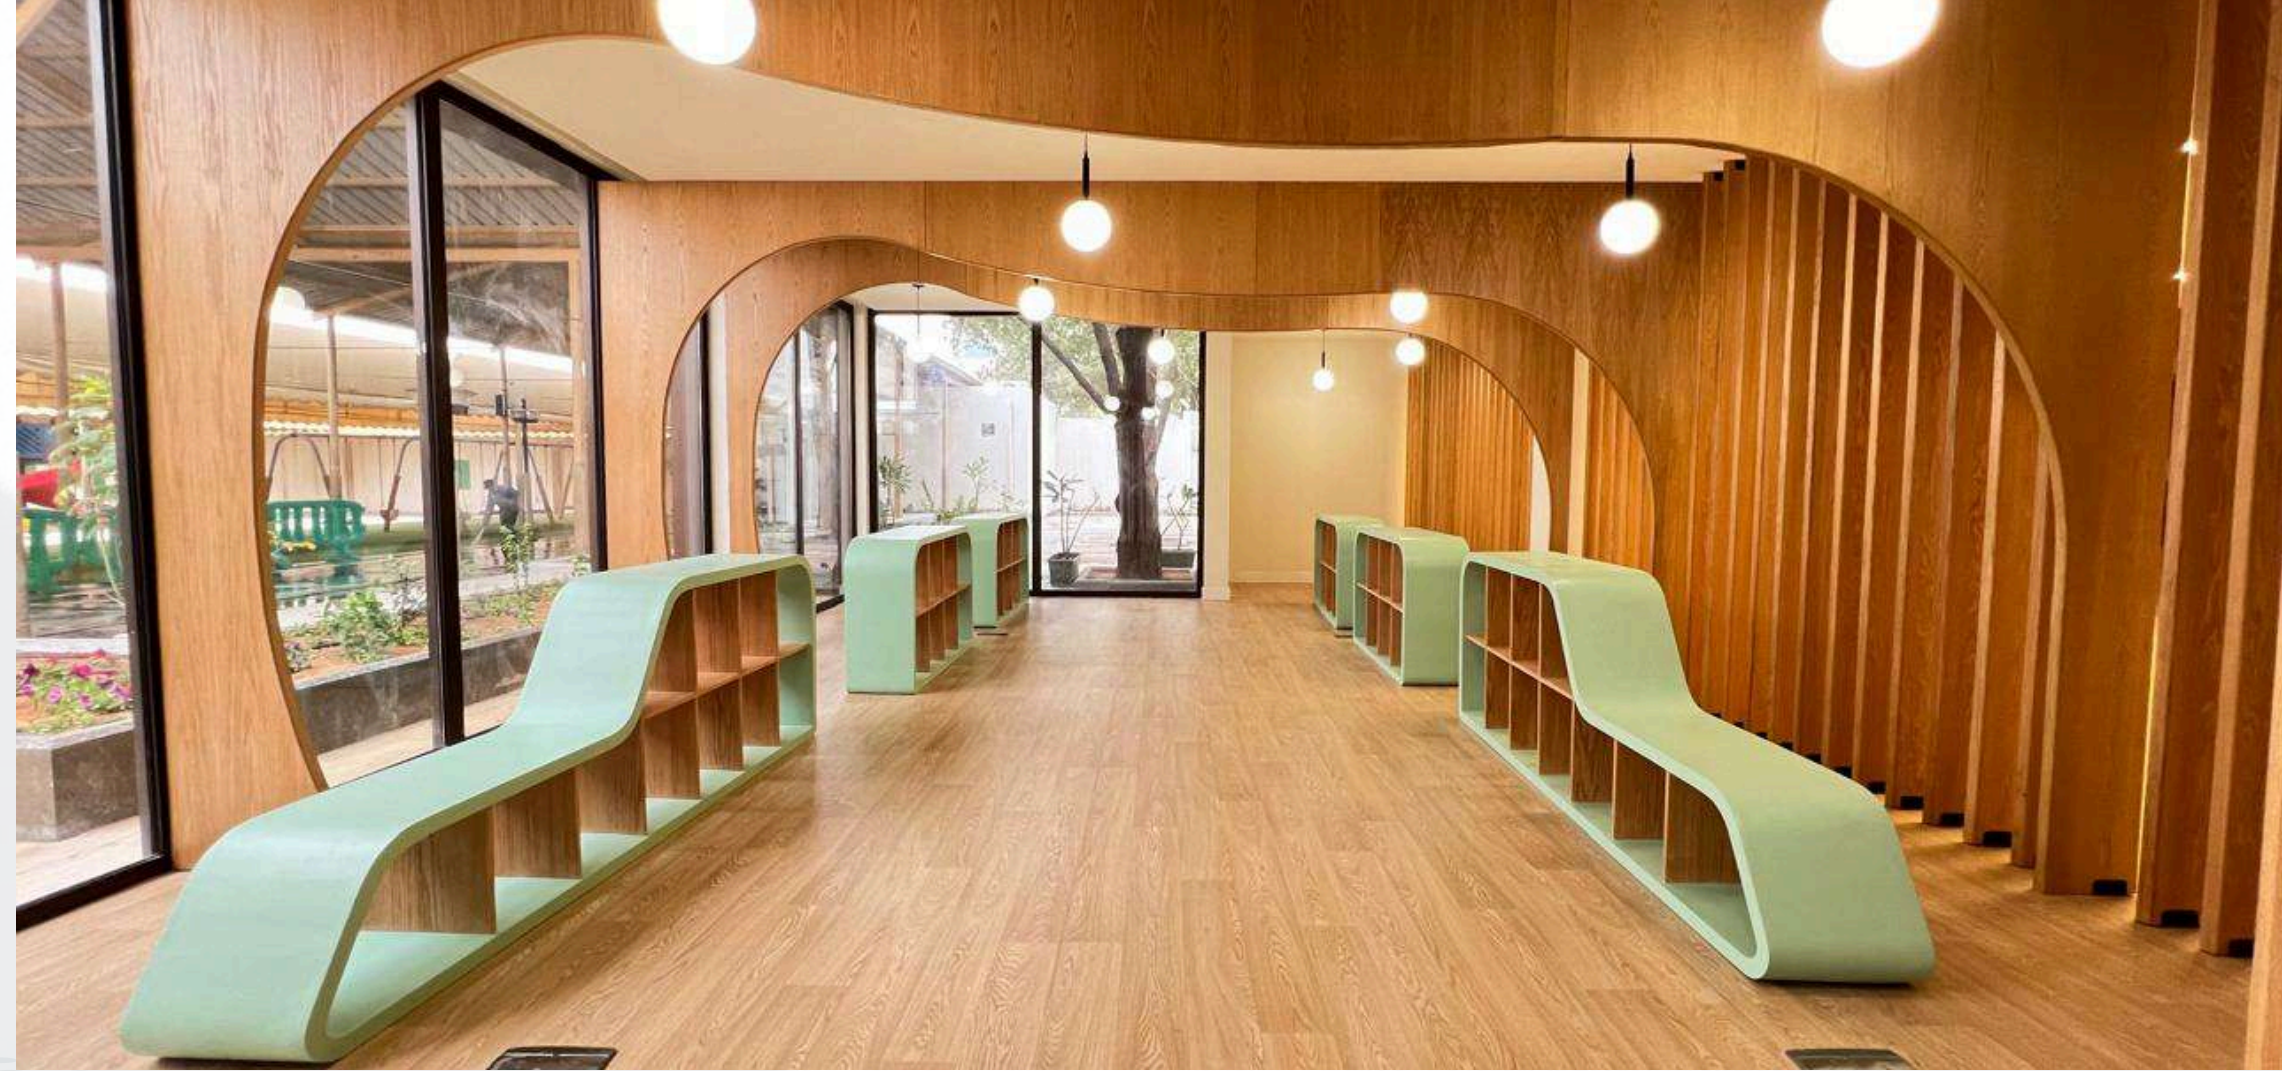

2: Cultural Considerations and Community Engagement

A central part of our approach was rooted in understanding the unique needs of Islamic schools and engaging with the community to ensure the project aligned with their expectations. The cultural significance of privacy, gender separation, and respect for the environment played a crucial role in the planning and execution phases.

We conducted numerous consultations with school administrators, religious leaders, and parents to ensure that the playgrounds would meet the highest standards while respecting Islamic traditions. Separate play areas for boys and girls were carefully designed to maintain privacy without compromising on play space or functionality. This allowed students to enjoy active play in an environment that honored their cultural and religious values.

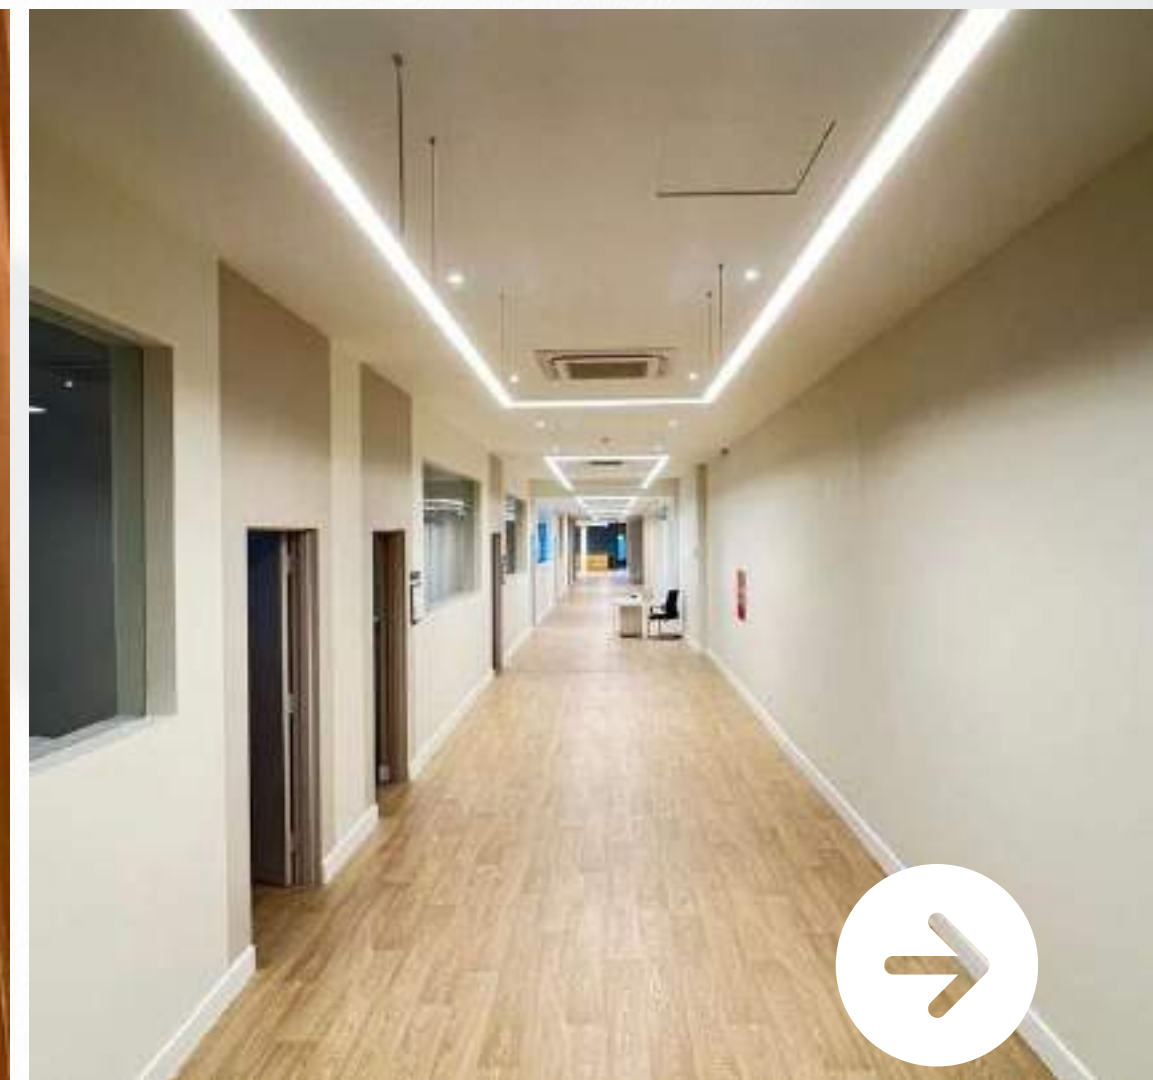

3: Design and Innovation: Merging Tradition with Modernity

One of the highlights of this project was the ability to merge traditional Islamic design principles with modern architectural innovation. Our design team drew inspiration from Islamic art, which often incorporates geometric patterns, symmetry, and flowing lines. We infused these principles into the layout and structure of the playgrounds, creating visually appealing and spiritually harmonious spaces.

We also leveraged cutting-edge design software and architectural tools to visualize the playgrounds from various angles, ensuring every detail was meticulously planned. Our designers worked closely with educators to develop areas that encouraged cognitive development, problem-solving, and teamwork, all while maintaining the aesthetic integrity of Islamic architecture.

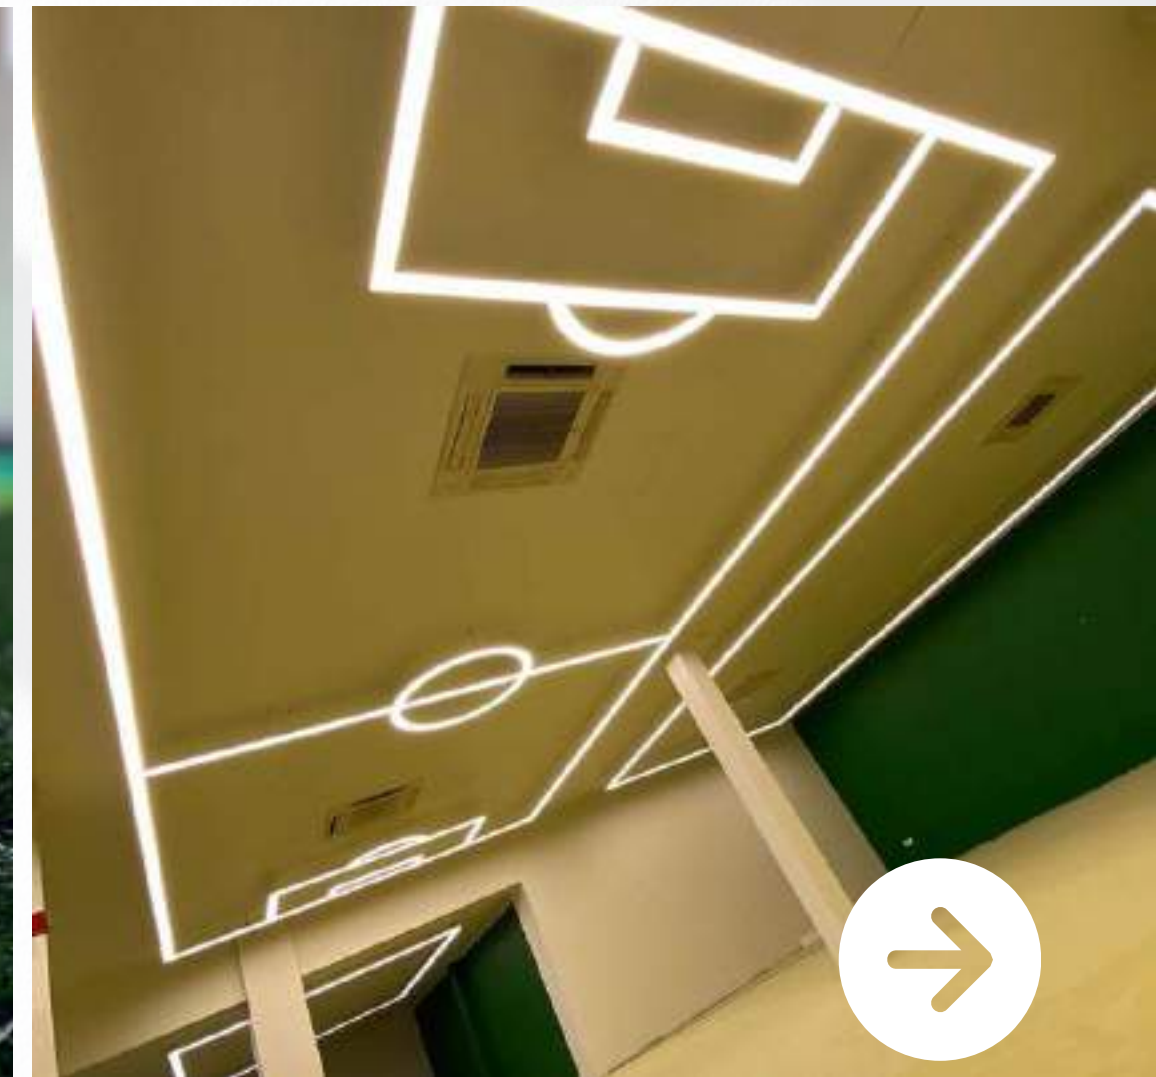

4: Material Selection: Durability Meets Sustainability

In a region where weather conditions can be harsh, selecting the right materials was a critical aspect of the project. We placed a strong emphasis on choosing materials that were both durable and environmentally sustainable, ensuring the playgrounds could withstand years of use without compromising on safety or aesthetics.

Eco-friendly rubber flooring was installed to cushion falls and provide a safe surface for students to play on, reducing the likelihood of injuries. Additionally, we sourced high-quality, weather-resistant metals for playground equipment, ensuring long-lasting performance even in the face of high temperatures and humidity. These materials were chosen not just for their functionality but also for their contribution to a sustainable, low-maintenance future for the schools.

5: Safety and Compliance: Ensuring a Secure Environment

The safety of students is of paramount importance in any playground project. In compliance with international playground safety standards, we meticulously planned each structure and surface to minimize risks. Our design included soft edges, non-slip surfaces, and sufficient space between equipment to reduce the risk of accidents during playtime. Furthermore, we incorporated natural barriers and fencing around the playground areas to ensure that the spaces remained secure, offering both peace of mind for the school and freedom for students to explore and play. Regular consultations with safety experts ensured that all elements of the playground were compliant with industry best practices and the specific regulations for schools.

Progress Concept

In summary, the playground project has left a lasting impact, providing a joyful space for current and future generations while upholding the school's cultural and educational values. We are honored to have played a role in this transformative project and look forward to seeing the continued positive influence it will have on the community.

INFRASTRUCTURE AND ROAD WORKS

Our Project

INFRASTRUCTURE AND ROAD WORKS

The road work project includes several phases, starting with the demolition and removal of the existing pavement and infrastructure. This is followed by the installation of new pavement, curbs, gutters, and sidewalks, as well as the installation of new traffic signals and lighting. The project also includes upgrades to the drainage and stormwater management systems to improve water quality and reduce the risk of flooding.

The project has been carefully planned and executed by our team of experienced engineers, project managers, and construction workers. Our team has worked closely with local government agencies and community leaders to ensure that the project is aligned with the needs and priorities of the community.

INFRASTRUCTURE AND ROAD WORKS

Our company takes great pride in the quality of our work, and we are committed to delivering a finished product that exceeds the expectations of our clients and the community. We use only the highest quality materials and equipment, and we employ skilled workers who are experienced in all aspects of road construction and maintenance.

Throughout the construction process, we have taken great care to minimize disruption to local residents and businesses. We have implemented traffic control measures and detours to ensure that motorists can safely navigate around the work zone, and we have worked closely with local businesses to ensure that access to their establishments is maintained throughout the project.

FINSHE INFRASTRUCTURE AND ROAD WORKS

At the end of the project, we are confident that the community will have a reliable and safe transportation infrastructure that will benefit all residents and businesses. Our company takes pride in contributing to the development and improvement of local infrastructure, and we look forward to delivering a successful project for our clients

LANDSCAPE

Our Project

ELMONTAZA GARDEN

General contractor : Nabatat Contracting Company
Subcontractor contractor : Progress Concept Company

Our company specializes in providing high-quality landscape work for residential and commercial properties. We understand that the first impression of any property is its exterior, and that's why we focus on creating breathtaking landscapes that will leave a lasting impression.

Our team of experienced landscape professionals takes great pride in their work and strives to exceed our clients' expectations on every project. We use only the best materials and techniques to ensure that each project is completed to the highest standard. Whether it's a small backyard makeover or a large commercial property, we are equipped to handle any project, big or small.

ELMONTAZA GARDEN

General contractor : Nabatat Contracting Company
Subcontractor contractor : Progress Concept Company

In summary, our company offers top-notch landscape work for both residential and commercial properties. We take pride in our work, use the best materials and techniques, and strive to exceed our clients' expectations. Contact us today to learn more about how we can transform your outdoor space into a beautiful oasis.

ELMONTAZA GARDEN

General contractor : Nabatat Contracting Company
Subcontractor contractor : Progress Concept Company

Our landscape services include but are not limited to lawn care, tree and shrub planting, hardscaping, irrigation system installation, and landscape lighting. We work closely with our clients to ensure that their vision is brought to life, and we always take into consideration the unique characteristics of each property we work on.

At our company, we believe that a beautiful landscape should be sustainable and environmentally friendly. That's why we incorporate eco-friendly practices and materials in our work wherever possible. We take pride in creating landscapes that not only look stunning but also contribute to a healthier planet.

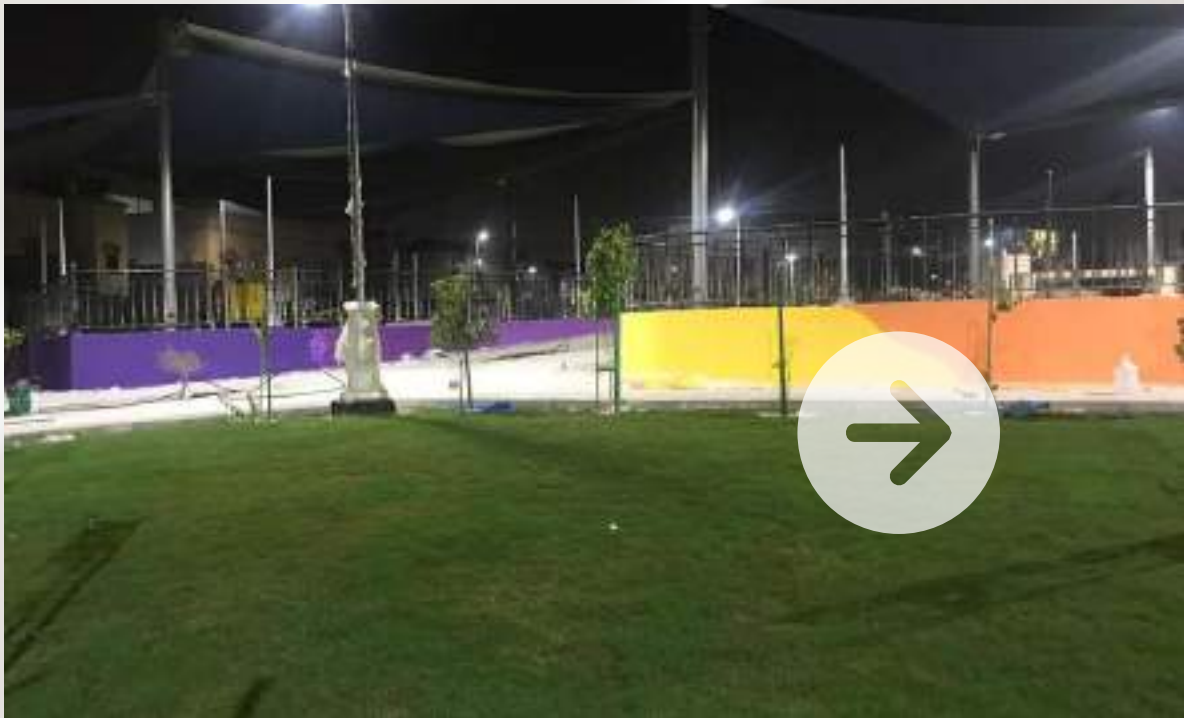

TIBA GARDEN

General contractor : Nabatat Contracting Company
Subcontractor contractor : Progress Concept Company

Our company specializes in creating beautiful and engaging landscape designs for various settings, including residential properties, commercial buildings, and public spaces. Our team of experienced professionals works closely with clients to develop customized plans that suit their unique needs and preferences.

We understand that landscapes play an important role in enhancing the aesthetic appeal and functionality of any space. That's why we use a combination of natural elements, such as plants, rocks, and water features, as well as artificial materials, like paving stones and retaining walls, to create visually stunning and functional landscapes.

TIBA GARDEN

General contractor : Nabatat Contracting Company
Subcontractor contractor : Progress Concept Company

Our work in the kids' area is also an essential part of our services. We know that creating safe and fun play areas for children is crucial for their physical and mental development. We take special care in designing play areas that not only provide a range of activities for children but also incorporate safety features to minimize the risk of accidents.

We have a range of options for kids' play areas, from traditional playground equipment to custom-made structures that cater to specific age groups and interests. Our team works with clients to ensure that the play area design fits seamlessly with the overall landscape design, creating a cohesive and enjoyable experience for everyone.
